Majid Dousti

Technical Program Manager | Hardware, Manufacturing & Product Launch
Dayton, OH (open to relocation) — Permanent Resident — (434) 326-2187 — Dousti.explore@gmail.com
linkedin.com/in/majid-dousti — Google Scholar

Technical program manager with 7+ years delivering automotive, industrial, and consumer electronics programs from requirements and validation through launch. Leads engineering, quality, supplier, and customer teams on scope, schedule, budget, quality, risk, and critical path. Builds dashboards and reporting mechanisms that teams keep using, currently on Ford and Rivian programs at Fuyao Glass America. M.S. Mechanical Engineering; M.S. Computer Science expected Fall 2027.

Experience

System and Quality Engineer May 2026 – Current
Fuyao Glass America Dayton, OH

- **Design verification:** Tracked Ford windshield DV to 103 of 110 DV tests (94%) passed on schedule; 7 long-duration tests aligned with Ford, 2 of them delayed by discontinued material.
- **Edge stress defect:** Resolved a 4-month windshield edge stress defect in 20 days through root cause studies and three debug trials across furnace, engineering, and quality; locked the resulting parameters as the production standard (Ford).
- **Ford windshield, sidelite, and roof program:** Finalized, with the team, the second version of the Special Characteristics Communication and Agreement Form (SCCAF) and Control Plan, signed by both sides and ready to implement on the production line.
- **Production verification:** Prepared the PV test list after the DVP&R, checked against regulations and standards; supported gate reviews with control plans and measurement system self-assessments (Ford).
- **Optical investigation:** Led a camera-zone transmissivity investigation; the technical report resolved core misunderstandings with the customer camera team (Ford).
- **Customer reporting:** Standardized the reporting system for easier and faster accessibility and decision making (Ford).
- **Measurement reports:** Standardized checking-fixture measurement exports into reports against specification limits using AI-assisted tools.
- **Customer support:** Technical contact keeping deliverables, product changes, and specifications within contract scope (Ford).
- **Safe launch dashboard:** Built a live yield and defect dashboard for a 90-day Rivian Safe Launch; yield rose from 64% to 85% in two months.
- **Scaled mechanism:** Set up the same dashboard for other teams in Safe Launch, where it remains in use.
- **New production line:** Worked with production and tooling teams to integrate a new line, setting targets, tracking the critical path and milestones, and resolving bottlenecks to prepare the facility for launch.
- **Ford Q1:** Member of the team recognized as a Ford Q1 Preferred Quality Supplier.

Teaching Assistant, Computer Programming Jan 2025 – May 2026
Wright State University Dayton, OH

- **Teaching:** Taught Computer Programming to about 45 students.
- **Labs:** Ran the course lab sessions.
- **Office hours:** Held office hours for students.

Product Development Engineer Nov 2023 – Jan 2025
AmeriWater Co. Dayton, OH

- **Technical Program Lead:** Led full-lifecycle execution for two models in the AWRO reverse osmosis family (AWRO 1200 to 19200), from material selection and prototyping through production release.
- **Schedule:** Finished and tested the prototypes of two AWRO family models 15 days ahead of schedule.
- **Integration:** Integrated control systems with electrical and PLC engineers; validated against customer requirements.
- **Vendors:** Evaluated materials and sourced custom parts within a team budget.
- **Testing:** Ran testing and failure analysis with Quality, including PAA testing and FDA and GD&T compliance.
- **Documentation:** Managed BOMs in Intuitive ERP; produced CAD models, GA drawings, and operation manuals.

Associate Technical Program Coordinator Oct 2019 – Dec 2021
Meranti Co. Tehran, Iran

- **Systems:** Led the team that built BOMs for all company products and the company's CRM system.
- **Team leadership:** Led the product engineers added as the team grew while continuing product design work.
- **Delivery:** Delivered 3 projects with design and first prototype on schedule.
- **Customers:** Gathered customer requirements, defined project needs, and dispatched installation teams.
- **Vendors:** Worked with multiple vendors to source parts, ran incoming quality control with QA, and controlled costs.
- **Schedule:** Aligned engineering and field installation teams on timelines, critical path steps, and delivery milestones.

Product Engineer April 2018 – Oct 2019
Meranti Co. Tehran, Iran

- **Built from zero:** Joined at the company's start and owned its product designs and full product catalogs for office furniture.
- **Training:** Trained installation and execution teams to deliver office furniture projects.
- **Product lifecycle:** Took products from concept layout through installation validation, applying GD&T and tolerance analysis.

Technical Program Coordinator April 2016 – March 2018
Samsung / Regional Office Tehran, Iran

- **Samyar app:** Managed weekly meetings with the Samyar app development teams using real market data, and brought market feedback to design teams through recurring working sessions.
- **Launch:** The Android and iOS app reached 65,000+ registrations in launch week and 80,000+ users across about 15,000 branches.
- **Requirements:** Turned market data and branch feedback into functional specifications and backlog items.
- **Coordination:** Aligned branches, Dubai vendors, and Samsung HQ engineers on milestones and release dependencies.
- **Release:** Tracked sprint progress with software teams and ran UAT for multi-platform release readiness.

Selected Programs

Ford windshield and sidelite design to production verification, Fuyao Glass America	2026
Rivian safe launch dashboard, scaled to other programs, Fuyao Glass America	2026
OASiS Rapid Certification in semiconductor manufacturing, Intel-endorsed	2025
Neural surrogate for melt pool modeling (3D CNN), M.S. Mechanical Engineering thesis	2025
Reverse osmosis systems, AWRO 1200 to 19200, AmeriWater	2023–2025
Digital twin of synchronized laser arrays (FEM), Advanced Manufacturing Technology	2022
Samyar app, 65,000+ launch-week registrations, Samsung regional office	2016–2018

Education

Master of Computer Science, Wright State University, GPA: 3.8/4	Expected Fall 2027
M.S., Mechanical Engineering, Wright State University, GPA: 3.91/4	July 2025
Bachelor's Degree, Civil Engineering, University of Zanjan	2008 – 2013

Core Skills

Program Management: cross-functional program delivery, requirements, scope, schedule and milestone tracking, critical path management, budget management, risk and dependency management, stakeholder management, vendor coordination, KPIs and metrics, process building, MS Project, Smartsheet
Validation & Launch: design verification (DV), production verification (PV), DVP&R, gate reviews, safe launch, control plans, measurement system assessment, root cause and failure analysis, user acceptance testing (UAT)
Data & Software: SQL, Tableau, Python, MATLAB, C++, LabVIEW, Excel dashboards, data analysis, AI-assisted tools, FEM simulation (MOOSE)
Engineering Systems: BOMs, ERP (Intuitive), engineering change orders, systems integration, GD&T, CATIA, SolidWorks, Autodesk Inventor, AutoCAD, Mastercam

Selected Honors

Reviewer, Materials Science and Engineering: A (Elsevier), May 2022 – Present | Travel Award, Material Research Symposium, Seattle, WA, April 2025 | Travel Award, 10th International Conference on Multiscale Materials Modeling, Baltimore, MD, Oct 2022 | SolidWorks Instructor, Intel Summer Internship Program for Minorities, Wright State University, July 2023
